IT Resource Achieves Microsoft Gold Certification

Coopersville, MI – December 1, 2010 – IT Resource has achieved Microsoft Gold Certification, which is the highest level an independent business can achieve in the Microsoft partnership program.

Achieving the Microsoft Gold Certification means that IT Resource will be recognized for demonstrating a technical level of expertise in several areas including infrastructure, networking, and business intelligence.

Gary Lutz, managing partner of IT Resource, is excited about the new certification and what it will bring to existing and potential customers. “The benefits that we receive from our Gold status will allow us to enhance the services we provide to our customers,” he says. “This certification validates the relationship that we’ve had with Microsoft for over a decade.”

To acquire the certification, IT Resource was required to demonstrate their knowledge of specific technology solutions, take additional certification exams, and receive outstanding customer references and referrals to verify expertise.

IT Resource is a provider of Information Technology services throughout the state of Michigan. They provide cost effective IT solutions for customers including consulting, virtualization, unified communications, messaging solutions, and disaster recovery.
