IT RESOURCE
BUSINESS SOLUTIONS

Whether your IT staff consists of a single person, an entire department, or no one at all, many times you need outside expertise to find and implement the right Information Technology solutions. IT Resource has always provided highly-skilled IT consulting and engineering services on a variety of platforms, applications and hardware.

Virtualization Solutions

Virtualization of servers, storage and networks can improve efficiency and availability of your IT systems while drastically reducing on-going hardware and service costs. From simple server consolidation projects to complete Cloud Computing solutions, IT Resource has the experience and certified engineers to transform your existing systems into highly flexible, redundant and cost-effective virtualized environments.

Wireless Solutions

Whether your business requires a simple access point or a fully integrated mobility solution, IT Resource has the experience and expertise to provide a cost effective and secure wireless solution customized for your business needs. A wireless network solution can free your employees from being tied to one location, increasing productivity and teamwork. By integrating voice and data into one well managed wireless solution, all business critical systems can be made available to all employees throughout the organization.

Security/VPN

With the advent of SSL VPN, Secure Access Control, and Secure Mobility, the corporate office can now be accessed from anywhere. Mobilizing your workforce can increase efficiency many times over and IT Resource is at the forefront of deploying this technology to our business customers. The protection of your data from threats is also paramount in running a successful business. Whether that threat comes from inside or outside the corporate office, IT Resource has the skill and knowhow to engineer solutions to protect your most important asset – your data.

## Small to Medium Business (SMB) Solutions

If you own a small or medium sized business you still need technology solutions that can take on your competition, and give your business the edge it needs to drive growth – all without breaking your IT budget. Our experience with highly technical, large enterprise solutions, combined with our dedication to the SMB marketplace allow us to offer enterprise-level results at a cost that even the smallest business can afford. Our SMB solutions provide customers with necessary business operations like unified communications, e-mail & messaging, virtualization, and backup solutions at a fraction of the cost of enterprise systems. Just because you are classified as a small or medium business doesn't mean you can't have enterprise capabilities.

Unified Communications

Simplify business processes that depend on human interaction. Cisco® and Microsoft® Unified Communications solutions help close the productivity gap created by globalization. By using the intelligence of the network for context and collaboration, your organization can move with greater speed and agility. Employees, business partners, and customers can connect in real time and conduct business across multiple work spaces.

Unified Messaging Solutions

Voice and unified messaging solutions let you take control of your communications experience and maximize productivity. Whether you seek a basic voicemail solution, integrated messaging with e-mail, web, and mobile clients, or unified messaging with all your voice, fax, and e-mail messages stored in the same inbox, we can help your business maximize your voice and messaging systems capabilities.
